

Patent Attorney - Chemical / Life Science

Outstanding opportunity at growing Midlands firm

About us

AdamsonJones is a growing private practice based in the centre of Nottingham. Our patent work is diverse, but with an emphasis on the fields of chemistry, pharmaceuticals, bioscience and medical devices. Our clients range from small start-ups and established private companies to multi-national corporations. We are located in BioCity, Nottingham's healthcare and bioscience innovation centre.

The opportunity

We now wish to strengthen further our Chemistry & Life Sciences team, and would like to hear from high-calibre recently- or part-qualified individuals who can demonstrate a record of high academic achievement in a relevant discipline, and who feel that they could contribute to the growth and development of our business.

The candidate

Our main concern is to find people who share our values: dedicated team workers with a commitment to excellence in their work. If you have the qualities that we are looking for, and if you would like to be part of a growing business with excellent long-term prospects, then we would like to hear from you.

To apply

Please forward your CV and covering letter to: careers@adamson-jones.co.uk.
